**Web Design and Development**

**Project Assignment | Final Submission and Discussion**

Name: Jonathan Meunier  
Student ID: 1230163950  
Date: 7/10/2026

**Instructions:** Congratulations, you made it to the end of the course! Use the following to have a written discussion about your experience in the course and the final project. After you answer the questions below, insert a screenshot of each of the pages you have completed so far (remember, you should have at least 4 and the CSS file). Do NOT screenshot the html code because we can't run the code. Save the file to yourasurite – Project – Assignment 5.docx file and yourasurite – Project – Assignment 5.pdf file.

Before submitting this document and all your project files, make sure you meet all of these requirements listed in the CIS300 Project Instructions.pdf file.

**Discussion Questions**

1. Now that you are finished with your project, your original concept of your project might have changed a lot. Discuss in detail the differences between your initial project design and your final product. Why did you make these changes (if you had any)? (5 points)

The initial project design I would say was very bare bones. At that point, I didn't even know all of the services that we offered, what kind of information I wanted to include on the site, and we were just getting started paying our equipment off. I added services, videos, and different kinds of images that I didn't originally plan on doing. ( I will likely be continually changing this site as we grow as a company). The biggest changes were probably the layouts to match what I felt was a better user interface and experience.

2. Describe in detail why you chose the design layout you did. Are you happy with the outcome? Did you run into any issues with your design while developing your site? What did you do to overcome those issues? Would you do anything differently the next time you designed a website? (5 points)

I chose the design that I made because it seemed to align with other window cleaning companies owned by people that I know are successful in the industry. I also took some creative steps in adding more information about us because that really is what distinguishes our company from the rest. I ran into issues a lot with the images and videos. They were originally .mov's and .HEICs, so I had to either have the built in chatbot convert them into pngs or mp4s, or I just found converters online. Additionally, some of the mobile UI was a bit difficult to get right, and that took a lot of trial and error. I also ran into issues with image sizing, font sizing, and header stuff. I overcame those by brute force trial and error. It took a lot of time to finish this. The last Github commit was massive. I think next time I design a website (if it is heavily image dependent) I will build a massive portfolio of images and content to choose from and curate. I found that I didn't have enough images and videos to go along with all the information on our site. I will continue to better document our jobs from here forward.

3. You likely encountered challenges while working on your final project. In detail, describe the challenges you encountered and what you did to overcome them. (5 points)

**Project Assignment | Final Submission and Discussion**

I had a lot of difficulty with Github and figuring that out. I had never used it before. I used Claude a lot. I uploaded screenshots of every step-by-step thing when committing and pushing and would have them give me a detailed how to. I also have a friend who is a full-stack SWE at SAP who would help me with the GitHub and VS Code stuff (he never did any of the work for me). He helped to teach me what terms meant, where to fix things, and how to problem-solve on my own. Obviously, the course material was helpful. However, I found that when I needed specific fixes, it was less efficient to skim through all of the material rather than using other resources such as Claude, my friend, and trial/error.

4. Describe several concepts that you learned during this course that you found interesting and useful. Where there any concepts that you wish more time was spent on? Is there anything you would have like to incorporate into your final project that wasn't covered during this course? (5 points)

I learned so much in this course honestly. I had never done any front end development in the past. All I had done was data interpretation and interpolation with Python and Matlab. I would say that those skills gave me a sort of baseline understanding of coding and syntax. For someone like me who hates coding, I am very proud of the website that I was able to basically build from scratch. I find that I like my website more than the generic competitors who just use Claude or another AI to whip them up a website in 5 minutes. Even though this is a front end course, I would have liked a little backend stuff for the form section thing. That's about it. (kind of nitpicky). In my final project I would have liked to directly embed Google Reviews and have it update in the Reviews page, however I have 0 reviews on my Google Business Profile at the moment.

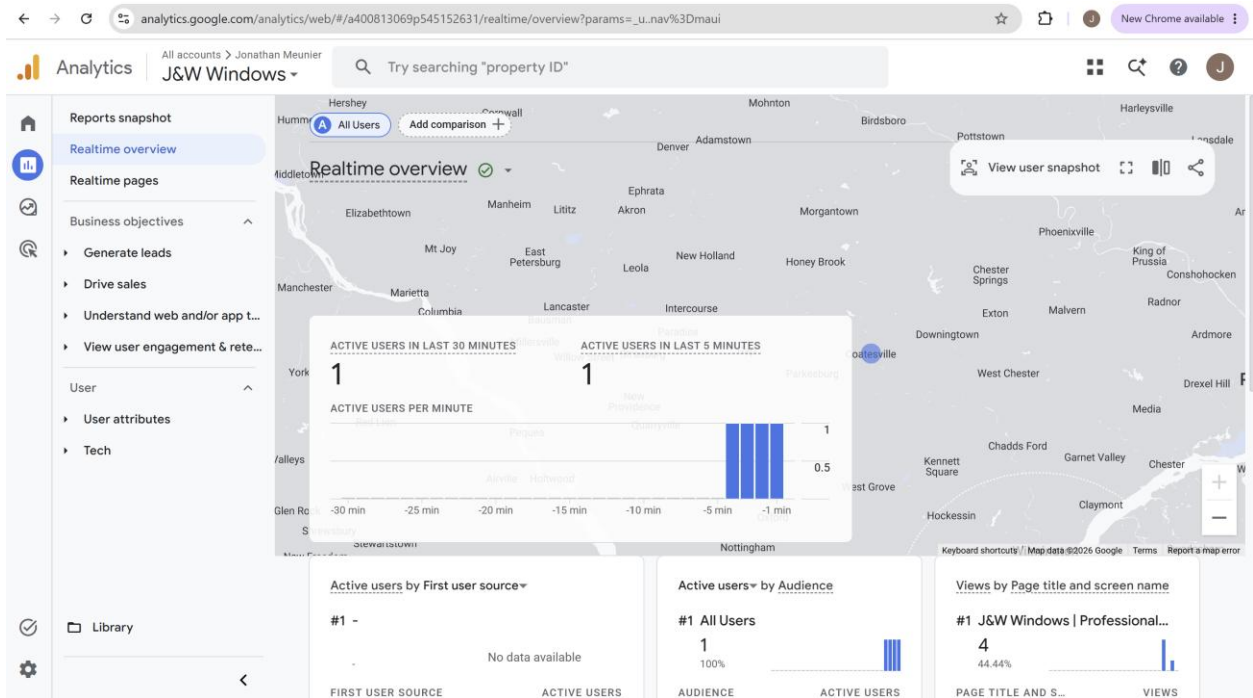

5. List your project website's GitHub URL. (3 points)

<https://jpmeunie-meunier.github.io/CIS300-S-26-Meunier/index.html>

6. Insert your website's Google Analytics Realtime Overview Screenshot below (10 points)

**CIS 300**  
**Web Design and Development**

**Project Assignment | Final Submission and Discussion**

7. While trying to be as objective and unbiased as possible, please go through and critique your own site using the attached rubric. In the student critique column, indicate which score you should receive for each category (outstanding, average, or needs improvement) and write a short (1 or two sentence max) justification of that score. (5 points)

**Student Critique**

|                               | Outstanding                                                            | Average                                           | Needs Improvement                                      | Student Critique                                                                                                                               |
|-------------------------------|------------------------------------------------------------------------|---------------------------------------------------|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>EXAMPLE</b>                | You did everything!                                                    | You did a few things.                             | You did nothing...                                     | Outstanding – I believe I did everything correctly because of x, y, and z.                                                                     |
| <b>Visual Appeal</b>          | Use of color, contrast, text, graphics is appealing to target audience | Appealing to target audience in all but one area. | Not appealing to target audience in more than one area | Outstanding – I feel that the colors align with the company, the images support our work, and I think it looks great                           |
| <b>Navigation</b>             | Easy to use, consistent                                                | Inconsistent or difficult to use                  | Missing                                                | Outstanding – I think it's good that at the bottom of every page there's links that will take you to the other pages. Clear and easy to follow |
| <b>Page Titles/ Logo Area</b> | Descriptive and include the site/company name                          | --                                                | Missing or does not include the site/company name      | Outstanding – company name and good descriptions for each page.                                                                                |

|                        |                                                                                                    |                                                                                                     |                                |                                                                                                         |
|------------------------|----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|--------------------------------|---------------------------------------------------------------------------------------------------------|
| <b>Table</b>           | Present and correct syntax                                                                         | --                                                                                                  | Missing or incorrect syntax    | Outstanding – Easy to get an idea of what it will cost                                                  |
| <b>Video</b>           | Present and correct syntax                                                                         | --                                                                                                  | Missing or incorrect syntax    | Outstanding – two videos included, and I like what I did with the background one                        |
| <b>E-mail Link</b>     | Present and correct syntax                                                                         | --                                                                                                  | Missing or incorrect syntax    | Outstanding – I don't have a business email but my personal is there                                    |
| <b>Outside Link</b>    | Present and correct syntax                                                                         | --                                                                                                  | Missing or incorrect syntax    | outstanding – BBB and google business review link                                                       |
| <b>Meta tag</b>        | Correct syntax (description meta tags), excellent selection of keywords and meaningful description | Correct syntax (description meta tags), adequate selection of keywords and description              | Missing or incorrect syntax    | Outstanding – All keywords are relevant and meaningful to the business and the services that we provide |
| <b>Form Coding</b>     | Contains 4 or more form fields, correct syntax, and meaningful form element names                  | Does not contain the required 4 form fields, incorrect syntax, or names of fields don't make sense. | Missing                        | Outstanding – I have way more than 4 fields, correct syntax, and meaningful names.                      |
| <b>Form Processing</b> | Form uses # as the action.                                                                         | --                                                                                                  | Form not configured correctly. | Outstanding – Does use #                                                                                |
